

AHCCCS is supporting integrated and team-based care for providers serving AHCCCS members, and we want you to get in on it!

The AHCCCS Targeted Investments program provides \$300 million in provider incentives over five years through CMS approved and designated funding to help support behavioral and physical health care integration efforts. Participating practices and organizations will receive incentive payments for meeting benchmarks for physical and behavioral health care integration and coordination for individuals with behavioral health needs.

Primary care sites, ambulatory behavioral health sites, Integrated Clinics and acute and psychiatric hospitals are eligible for this opportunity to participate in the AHCCCS Targeted Investment Program (TI Program).

To be eligible to receive these additional payments, you must apply and meet initial requirements by August 18, 2017. This is a one-time opportunity.

AHCCCS has a <u>Targeted Investments Program webpage</u> with extensive information about the TI Program that provides details about how incentives are achieved and a calculator (<u>payment calculator</u>) to help estimate possible incentive payments. You will also find the easy to follow application and application instructions

We encourage you to visit the AHCCCS Targeted Investment Program (TI Program) <u>webpage</u> where full information and application resources are available to you.
