

## Partnership Delivers Actionable Patient Risk Intelligence

**Health Choice Arizona** has partnered with care optimization company **axialHealthcare** to offer practices a range of valuable tools and resources.

### Actionable Patient Level Intelligence

#### PATIENT NOTIFICATIONS

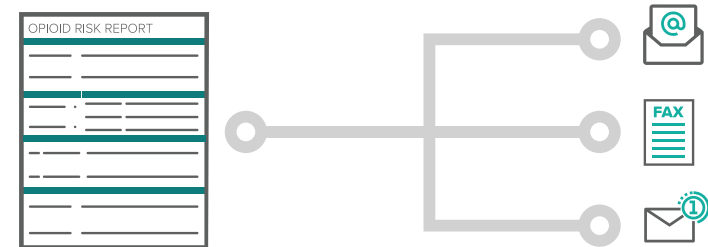

**NEW** **Niklas Forsberg**  
DOB: 08/07/1986 MEDD: 180 mg

Opioids Received from Multiple Providers    Benzodiazepine Use with Opioids

- Alert practitioners to patients with opioid-related risk for specific categories
- Risk categories include:
  - Benzodiazepine use with opioids, opioids received from multiple providers, opioid use during pregnancy, and patients recommended for an opioid use disorder evaluation

#### OPIOID RISK REPORTS

Generated for patients identified as displaying opioid-related risk, an Opioid Risk Report includes:

- Snapshot of key clinical information
- Tailored, patient-specific clinical considerations

*Workflow integrated delivery options:  
eFax, secure email, direct message to an EHR, and axialPRACTICE portal*

Contact us today to determine your reporting delivery preference, gain access, and learn more.
